

RADIUM FleetwareWeb

Fleet Management and Monitoring System

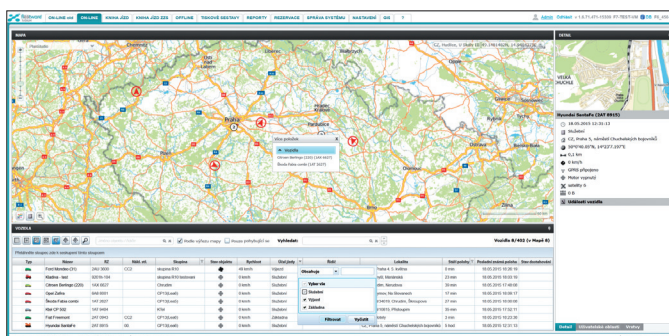

What does FleetwareWeb offer you?

Clear and detailed records

A comprehensive register of vehicles, bodies, mechanisms, containers, drivers, identification chips or cards, and fuel cards. Table records, multiple modifications, wide choice of filtering, and easy processing of thousands of items. A whole range of basic editable dials for perfect system configuration.

An overview of the fuel consumption, importing fuel purchase records, and fuel card management

Fuel consumption under control. The FleetwareWeb application allows you to check the fuel tank level, keep a detailed overview of all the fuel purchases and fuel losses, evaluate absolute and average vehicle fuel consumption, manage and allocate fuel cards as well as import or record fuel purchases.

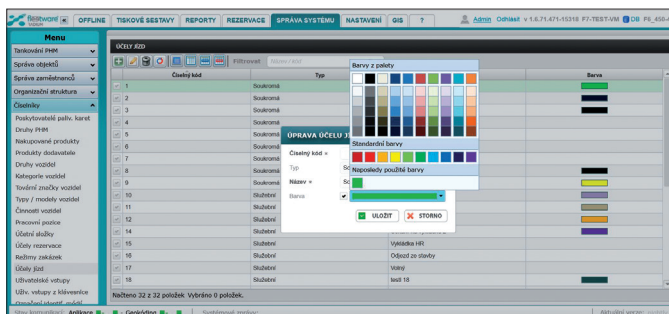

FleetwareWeb web portal – Online view

Optimization of your employees' efficiency

Monitor your employees in the field too, including documents about the place and time of working activities. Co-ordinate trips of your workers. Fleetware supports various ways and types of drivers' identification.

Mileage reduction

Reduce the distance covered by your vehicles. Having the vehicle equipped with the Fleetware system, the percentage of unproductive mileage gets demonstrably reduced.

System management – Dials, trip purposes

Automated registration of records of vehicle performance and electronic trip logs

Save your time - replace the paper and pencil with electronic vehicle operation records (ZVV or STAZ). Fleetware will provide cost data for private mileage payoff.

Insurance rate savings

Save your insurance cost thanks to superb vehicle security and monitoring.

Possible use of the vehicle terminal

Fuel purchases, odometer readings, jobs or dispatcher communication can be available directly in the vehicle on the vehicle keypad with the display or smartphone equipped with Android OS.

RADIUM FleetwareWeb

Fleet Management and Monitoring System

Advantages of our solution

Clear and friendly user interface

FleetwareWeb as well as the other Fleetware products are optimized for easy and quick operation.

Quality vehicle hardware

Vehicle units have a long lifetime, and most of the peripherals are developed and produced only in the Czech Republic.

Maps of the CR and Europe

The detailed maps of the CR and Europe are available and updated on a regular basis.

Vehicle event visualization over the maps

FleetwareWeb application may even display events like door or cargo space opening, fuel purchasing, starting/finishing of activities like the area entry/exit, activities in the area, etc.

User areas

FleetwareWeb application enables the user to draw important areas directly in the map.

Modularity

FleetwareWeb may be utilized in combination with most of the Fleetware products and services.

Selected features

- Secured data transfer and access to the web portal.
- Easy setting and use; fully automated operation.
